For more information and event requests please visit us on the Infrastructure Initiative website: [www.infrastructureinitiative.ch](http://www.infrastructureinitiative.ch)

## Event space

The event space is provided with a stage and two monitors for presentations. It can be rented as a stand-alone part of the STAGE and is perfect for conferences, presentations, panel discussions, standing & mingling as well as for workshops.

The event space can be separated by a curtain from the Lounge space and create a closed environment. It is surrounded by one full and one-half facade of windows which enable it to be filled with natural light. It can be arranged with classroom tables, workshop stations, standing tables or with a normal theater configuration.

## Lounge space

The lounge space is the central part of the STAGE and can be rented in addition to the Event space with the “Full space” formula. It allows for more space in case of a larger number of participants or it can be set-up for a different activity (e.g., workshops) after an input session in the Event space.

## Cubes

The cubes are three offices which are integrated into the Lounge space of the STAGE. They are accessible with a code since they are rented out for periods between two and six weeks. Every Cube is provided with one table, four chairs and a box containing basic IT-appliances.
